There is such a wonderful comrade named Andy Hunt. He is known, first of all, the authorship of the wonderful book programmer Pragmatik. The path from the apprentice to the master. Some know him as one of the authors of Agile Manifesto, and the author of an interesting book Pragmatic Thinking and Learning: Refactor Your Wetware.

In his book, Pragmatic Thinking and Learning Andy Hunt considers many interesting moments related to the work of our gray matter and pays a lot of attention to his work in the context of the software development. So, there is one interesting point to which managers and developers should pay, in the souls of which the fire has a fire for the successful application of the fashionable state of Agile Development.

And he is connected with the Dreyfus model, which, in turn, strongly resembles the concept of Syukhari known since the antiquity.
